Electronic thermostats for underfloor heating

READY STEADY GO

THE CHALLENGER IN BUILDING AUTOMATION

## Floorigo

### Flush mounted thermostats for control of underfloor heating

The new FLIS and FLD thermostats feature our Ready-Steady-Go concept. The microprocessor offers a very high accuracy. Other benefits are the built-in device that alarms if the floor sensor is installed too close to inductive loads or objects that affect the function. Alarm is also given if the sensor or a relay is not working correctly, or when a signal deviates from normal value. The built-in sensor compensates for internal heating, which ensures a stable and correct temperature control.

This sensor can be completed with a floor sensor (included at delivery). Either of the sensors can be chosen as main sensor for minimum or maximum limitation. The FLD model also features comfort mode with two temperature intervals per day. The function can alternatively be used for night setback.

The new FLITP thermostat with time proportional control works without external sensor.

**FLI-S**

- Setpoint knob
- 2 pole switch
- Night setback (5K) via external time relay
- Min-max limitation

**FLI-D**

- Display (time and temp)
- Comfort mode/night setback
- 2 pole switch
- Min-max limitation

**FLI-TP**

- Time proportional control
- Setpoint knob
- 2 pole switch
- LED indication for activated relay

| FLI-S            |           |
|------------------|-----------|
| Output           | 13A, 230V |
| Setpoint         | 0...40°C  |
| Hysteresis       | 0.4K      |
| Protection class | IP 21     |

| FLI-D            |           |
|------------------|-----------|
| Output           | 13A, 230V |
| Setpoint         | 0...40°C  |
| Hysteresis       | 0.4K      |
| Protection class | IP 21     |

| FLI-TP           |           |
|------------------|-----------|
| Output           | 13A, 230V |
| Setpoint         | 1...10    |
| Cycle time       | 30 min    |
| Protection class | IP 20     |

Frames matching Eljo and Elko are included with FLI-S and FLI-D
